ENTERPRISE IN KERRY

A SPOTLIGHT ON ENTREPRENEURIAL ACTIVITIES

The Kerry economic and entrepreneurial culture is one which promotes and supports the setting up of new businesses across the county in multiple sectors with a view to scaling.

The strong collaboration between industry, the Institute of Technology Tralee, Kerry County Council, local development partnerships and state agencies continues to foster the growth of indigenous and foreign direct investment organisations across the region. Now in its 5th year, 'Enterprise Month' continues to shine a spotlight on just some of the innovative and enterprising activities on offer to you all year round across the County of Kerry.

This year in addition to dedicating a week to each of our enterprise supporting organisations in Kerry, we are introducing a week towards enterprise supporting initiatives and collaborations across the Southwest region.

Starting a business can be daunting, but the many supports in place throughout the county are there to help and advise you through the process. Inter-agency co-operation and coordination is strong in Kerry, creating a focused enterprise development strategy dedicated to supporting entrepreneurs. Through these collaborative organisations up and coming entrepreneurs can avail of mentoring, workshops, networking, prototyping, market research and funding supports. Whether you are looking to grow your existing business or have an idea for an exciting new venture there is a wealth of advice and assistance available to you.

Kerry County Council recognises the importance of the indigenous business sector to County Kerry and continues to support these businesses, through the expertise of the Kerry Local Enterprise Office, North, East and West Kerry Development and the South Kerry Development Partnership providing on-the-ground business supports throughout the county.

The Tom Crean Business Centre and Kerry Technology Park provide start-up businesses with an optimum environment to build and scale an international business, by combining office space with business supports within a network of entrepreneurs. Údarás na Gaeltachta and Killarney Technology Innovation Centre offer similar environments in Dingle and Killarney respectively. We have also witnessed the setting up of additional hubs across the County which include the planned RDI Hub in Killorglin, The Dingle Creativity and Innovation Hub, The Sneem Digital Hub, The Skellig Centre for Research and Innovation and the Kerry Food Hub in Fries.

Dedicated entrepreneur development programmes, like the Enterprise Ireland funded New Frontiers programme delivered at the Institute of Technology Tralee, now have an alumni of over 50 companies and offer the supports to equip you with the skills and contacts that you need to successfully start and grow your company.

We look forward to welcoming and meeting you at the series of events that is brought to you by the Kerry Month of Enterprise and indeed throughout the year.
