Introduction

This Higher Diploma in Science in Nursing focuses on the field of Psychosocial Interventions for Mental Health and is planned to build on your experience in working with and caring for people with mental ill health and their significant others. The course design is based on the National Council for Nursing and Midwifery guidelines for Clinical Nurse Specialists and aims to provide a clinically focused pathway to help you to achieve a Higher Diploma.

This course is approved by An Bord Altranais and will commence in September in the Department of Nursing and Health Care Studies at the Institute of Technology Tralee.

The course is supported by the Nursing and Midwifery Planning and Development Unit and will be delivered in partnership with health care service providers and the Kerry Centre for Nurse Education.

Modules

Participants will undertake five modules in total:

- > Systematic assessment and care planning for psychosocial interventions
- > Mental health promotion and psychosocial education
- > Collaborative working in psychosocial approaches to mental health nursing
- > Specialist practice placement
- > Research skills in nursing practice

Academic Level

This course is set at academic level 8 on the National Qualifications Authority of Ireland Marks and Standards Framework.

Structure

Classes will be held in the Department of Nursing and Health Care Studies on Thursday each week. These classes take place during the months of September to May inclusive.

Entry to the Higher Diploma Programme:

Entry to this programme is based on the following criteria:

- > Prospective participants must be able to demonstrate at least three years of work experience within a mental health nursing setting
 - *At least six months minimum of this experience must be current at the time of application and successful learners must remain working in the area of specialisation throughout the length of the course.*
- > Prospective participants must demonstrate successful completion of a programme in nursing or cognate discipline of study to NQAI level 7.
 - *Registered nurses who are unable to demonstrate level 7 study will be required to complete the Access Studies Programme.*
- > Support from health service managers is necessary to participate in this Higher Diploma. When you request an application form for this programme, you will also receive an information pack for your manager. This pack contains a declaration of support form which must be completed and signed by your manager and returned by you with your application.
- > Prospective learners work areas of specialisation will be audited for suitability by the Institute of Technology Tralee placement auditing process. Previous educational audit may suffice.
- > Learners will be involved in selecting and working with, an approved practice mentor.

Progression

Candidates who successfully complete the Higher Diploma programme will be eligible, with an award level of 2.2 or higher, to continue their studies to Masters level or other NQAI level 9 studies at the Institute of Technology, Tralee.
